

Dear DoorDash Hiring Manager,

I am writing to express my enthusiastic interest in the Backend Software Engineer position at DoorDash. With a keen passion for software development and a freshly acquired degree in Computer Science, I am excited about the opportunity to contribute to the innovative work being done at DoorDash.

Throughout my academic journey, I have honed my skills in software development through rigorous coursework and hands-on projects. My coursework has equipped me with a solid foundation in algorithms, data structures, and software engineering principles, while my practical experiences have allowed me to apply these concepts to real-world challenges.

During my time at university, I have undertaken several software development projects, including a collaborative effort to develop a web-based application for streamlining over the counter medication selection in a local business. This experience not only enhanced my technical skills but also taught me the importance of effective communication and teamwork in achieving project success.

I am particularly drawn to DoorDash's mission of empowering local businesses and communities through technology. I am eager to leverage my skills and knowledge to contribute to the backend systems that drive DoorDash's platform, ultimately enhancing the experience for both customers and merchants.

I am confident that my academic background, coupled with my passion for software development, make me a strong fit for the Backend Software Engineer role at DoorDash. I am eager to bring my enthusiasm, creativity, and dedication to your team and contribute to DoorDash's continued success.

Thank you for considering my application. I look forward to the opportunity to further discuss how my skills and experiences align with the needs of your team.

Sincerely,

Quinn Marshall
